

Priyanka Lakkad

Senior Product Designer | Enterprise B2B SaaS | AI & Workflow Platforms

Portfolio • LinkedIn • plakkad06@gmail.com • 669 214 6225 • San Jose, CA • U.S. Citizen

Senior Product Designer with 5+ years of experience designing agentic, AI-powered enterprise SaaS platforms, specializing in workflow automation and data-intensive products. Proven track record leading 0-to-1 initiatives that turn complex operations into simple, trustworthy experiences. Led hiring for product designers and mentored design interns.

EXPERIENCE

Product Designer – Tata Consultancy Services (Interactive Design Studio)

2021 – Present

Santa Clara, CA

Design and ship enterprise software applications and AI-driven workflow systems for major brands, including Apple, Cummins, McKesson, Jaguar Racing, Sherwin-Williams, and Best Buy.

Apple | Enterprise Automation Initiative

Spearheaded end-to-end design of 0-to-1 GenAI agentic workflow systems as the sole designer for enterprise-scale automation, designing LLM-based tools that streamline manual processes, inventing interaction patterns for how people and AI agents divide work, and articulating design rationale to PMs, engineers and business stakeholders.

Global Manufacturing Company (Fortune 500) | Rebatify: Agentic Rebate Platform

[View Case Study](#)

Directed end-to-end design of a B2B rebate management platform replacing Excel-based workflows for Sales and Finance teams, centralizing rebate configuration and integrating CRM and ERP systems to cut manual effort by 45%.

Partnered with product managers and engineers to craft an agentic AI Program Builder that converts inputs into structured rebate rules with automated validation checks, reducing payout discrepancies by 25%.

Implemented an AI-assisted claims review system with anomaly detection and human-in-the-loop (HITL) checkpoints, giving reviewers a clear view of flagged claims before any payout was approved.

Pharmaceutical Company (Fortune 500) | ComplyOne: AI Compliance Platform

[View Case Study](#)

Led platform design from user research through launch, consolidating training and compliance data into a real-time dashboard that let enterprise teams monitor regulatory readiness and cut audit preparation time by 25%.

Designed role-based access controls (RBAC) tied to training completion, reducing compliance violations by 35% and preventing \$350K in annual audit remediation costs.

Devised a configurable escalation workflow system, using flow diagrams and data visualization to make high-risk issues legible and automate routing across teams, reducing resolution time by 45%.

Jaguar Racing | Interactive Digital Experience

[View Case Study](#)

Led visual and interaction design of an interactive digital installation for Jaguar's Gen 2 Formula E car at the London ePrix, enabling spectators to explore vehicle features and engaging over 20,000 attendees.

Operationalized a reusable interaction framework for future activations, reducing setup time by 31%.

EDUCATION

Master's – Human-Computer Interaction Design

Indiana University Bloomington

Bachelor's – Information Technology

COEP Technological University
