

Homepage Build Specification v2

Priyanka Lakkad Portfolio

This document is written for Claude Design. Treat every instruction as an implementation requirement, not a suggestion.

SECTION 01 — HERO

Purpose

Immediately communicate that this is the portfolio of a designer who specializes in intelligent enterprise systems. The hero should feel calm, premium and product-first.

Layout

- 12-column grid
- Max width: 1280 px
- Hero height: 80vh
- Left column: 7 columns
- Right column: 5 columns
- Page padding: 120 px
- Section spacing below hero: 180 px

Status

Text:

● ACTIVE

Priyanka Lakkad

Geist Mono, 13 px, uppercase, letter spacing 0.18em.

Purple dot (#8B5CF6), 8 px with soft glow (18% opacity). Pulse once every 5 seconds (800 ms), then remain idle.

Headline

Text:

**Designing intelligent
enterprise systems.**

Geist 80 px, weight 700, line height 0.95, max width 620 px, left aligned. Fade in from 20 px below over 600 ms after a 200 ms delay.

Supporting Copy

'I design AI-powered enterprise products that help teams organize complexity into intelligent workflows.'

20 px, weight 400, max width 560 px.

Buttons

Primary: Explore Projects. Height 48 px, radius 14 px, filled #8B5CF6. Hover: background +8%, soft purple glow.

Secondary: View Resume. Transparent with 1.5 px purple border (#8B5CF6). Hover: 5% purple tint, brighter border.

Living Canvas (Right Column)

Purpose: visually demonstrate organizing complexity into intelligent systems.

Initial state: 14 scattered words at 35% opacity with no overlap: Research, Compliance, Workflow, Automation, Business, Context, Trust, Users, ERP, CRM, Policies, Decision, AI, Risk.

Animation: starts 800 ms after page load, lasts 2.6 s, easing cubic-bezier(.2,.8,.2,1). Words glide independently (40–60 px/sec). No bounce, no overshoot, no connecting lines.

Final state: words align into a clean ordered composition. Caption fades in:

Organizing complexity into intelligent systems.

Animation never loops.

SECTION 02 — TRUST & CREDIBILITY

Three equal columns:

1. Expertise → AI-Powered Enterprise Systems
2. Experience → 5+ Years
3. Companies I've Worked At → monochrome logos: Apple, Cummins, McKesson, Sherwin-Williams, Best Buy, Jaguar Racing.

Logos are white by default; hover adds a subtle purple tint only.

SECTION 03 — SELECTED PROJECTS

Projects are stacked vertically (not a grid).

Card height: ~560 px. Near-square proportion.

Large framed product screenshot occupies ~60% of each card.

Project order:

1. Apple Enterprise Initiative
2. ComplyOne
3. Rebatify
4. Jaguar Racing
5. AI UX Design Pattern Library

Metadata Chips

Translucent purple chips (not buttons). Background rgba(139,92,246,0.10). Purple text. No border. Radius 999 px.

Metrics

Three metrics separated by subtle visible dividers (12% opacity). Large white numbers, muted labels.

Hover

Card translates upward 4 px. Border brightens. Shadow increases slightly. Duration 220 ms. No scaling.

SECTION 04 — CONTACT

Centered CTA:

Let's build something meaningful.

Buttons/links: Email, LinkedIn, Resume.

Do not display 'Available for new opportunities.'

GLOBAL RULES

Do not add sections.

Do not redesign layout.

Do not introduce gradients, blue accents, glassmorphism, AI illustrations, blobs, looping animations or dashboard layouts.

Prioritize typography, spacing and hierarchy over visual effects.
